General Instructions

1. The purpose of this document is to provide a clear and concise summary of the project's objectives and goals. It is intended to serve as a reference for all project team members and to ensure that everyone is working towards the same end.

2. The project is divided into several key areas of focus, each of which will be addressed in detail in the following sections. These areas include the project's scope, timeline, budget, and risk management.

3. It is important that all team members understand their roles and responsibilities within the project and how they contribute to the overall success. Regular communication and collaboration are essential for staying on track and meeting deadlines.

... supposed to be a list of prisoners paroled at Albany, Ga.  
 In a letter dated June 1, 1865 Brig (Gen) E. M. McCook states:  
 "The rebel troops with all public property, in the District of  
 Florida were surrendered to me by Gen (Gen) Samuel Jones on  
 the 10th of May 1865. The number paroled and already  
 reported to V&M and will doubtless reach 1000.  
 (Albany, Ga.) was included in the District of Florida on the

Shenandoah Dec 12 1894

A. Kirby Smith  
General Land Office  
Bureau of

In accordance with your  
order dated Head Quarters A. L. O. December 8 1894

I visited the Sulphur and Iron works located in Harrison  
County and beg leave to offer the following remarks

The Sulphur and Iron works are located in an extensive region  
of pine timber distant some four or five miles from  
the Sulphur Fork of Red River some eighteen miles  
from Lindale the County seat of Harrison County and near forty  
miles from Jefferson in Harrison County Texas.

The land is poor undulating and sparsely settled.

The ore is in close proximity to the furnace (by some  
they are four hundred yards) is more than abundant and of  
the variety called brown hematite so common throughout Texas  
and precisely similar to that treated at the Fort Worth works - the  
Limestone necessary to smelting the ore is not found in the  
vicinity of the works and if brought by land will have to be  
transported from beyond Springfield and a distance of about  
thirty miles. The supply of water appears to be adequate, but  
springs adjacent a branch which runs hard by the furnace.

If it should fail which is not probable, water is obtained from  
wells at the depth of fifteen to twenty feet. The furnace is built  
of brick is thirty six feet high and runs four acres of land  
and should yield from six to eight tons of pig metal. The land  
is in place and the tract consents to receive the ore. The building  
around the furnace is all that is required and some are possible

1895

Working room. Two engines are being placed to supply the  
current of condensed air to the furnace. The blast tubes  
are yet to be made and owing to the impossibility of procuring  
Cast Iron Cylinders, which are some desirable and which are  
more than expensive to adapt. Having lots of good wood it  
is made to supply their place until such time as Iron  
Cylinders can be procured. The Engine house is suf-  
ficient and all that is required for the purpose.  
A coal house has also been erected and filled with about  
20,000 bushels of coal - sufficient to supply the furnace  
some fifteen days. Another coal house will be required.  
The living house for the officers and men are constructed of  
wood and since the purpose required, those for the officers  
are cabins of pine logs, whilst those for the officers are of the same  
material more carefully joint together. There are two other  
Engines without boilers. If boilers should be procured these En-  
gines might be used in conjunction for making steam.  
A steam Engine moves now and has not yet. The steam  
has ceased to be of service for the want of fuel. I am  
informed that the entire force of Negroes employed in the  
to fifty. Whilst the Mechanics number four the two carpenters  
two Machinists and one Sawyer at the Saw Mill. The Driver  
a Machinist detailed at the Fort works in Marion County was  
at work here, said to have been sent by Capt. Purdie.  
There are six Collins saws at these works. A saw will be required.  
The Negroes are tasked for two cords of wood per day.  
The furnace will consume about 1,500 bushels of coal in burning  
four hours and it will take three cords of wood to make one  
hundred bushels of coal. To keep the furnace continuously  
in operation it will require say wood choppers.

To the gods telling and knowing say  
about the furnace as copper and charcoal say  
about the ore bank and Limestone say  
At 99 more

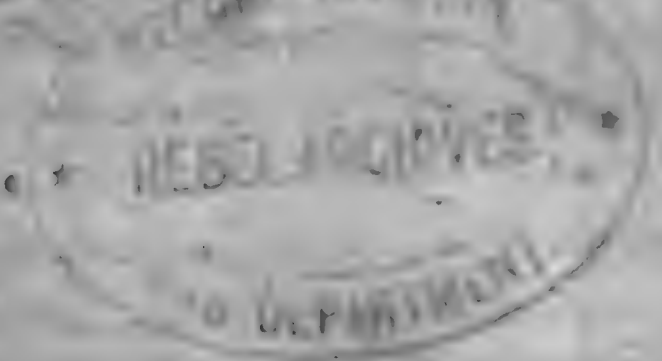

a portion of the year - should be taken advantage of for erecting  
 a small steam boat placed upon the stream with long flume  
 - close to the nearest point to the entrance - and have a con-  
 -veyer of coal which could be procured on the shore at a  
 much less cost than is now paid for that essential item  
 a Boat would be an economy and almost a necessity to the  
 Station - My impression is that energetic action with a view  
 to the building of the jetty in hand would make this work  
 a short time remunerative to the State by the sale of  
 waste value to the country  
 Accompanying at this time with some documents -  
 Very Respectfully Yours

Thos. J. Clendenen

It is understood of the word of mouth of one capable of knowing that  
furnaces for the manufacture of pig metal from the ore - You will enter  
into no engagements with those who can not show certificates of competency  
Major Smith will introduce you to the contractors with whom proposed work  
in Alabama. Mr. S. is now engaged in the Iron business & will be able to point  
you in communication with reliable gentlemen proposing the requirements which  
When I saw Mr. Sandy, he mentioned the names of two gentlemen who  
could render efficient services in this Department & whose names I should  
be pleased to receive. I think John was one who has been in the  
in the management of Iron; & of such high character & high  
high character for capability & integrity. I should think he would be pleased  
to come to Texas.

Another gentleman whose name I should like to see very much & all  
all the requirements in the Iron business, (as shown on the by name of John  
but does not know) Neither of these gentlemen are in Alabama when I saw  
them, but from what Mr. Sandy said of them they will be successful  
& you will secure them to come over as soon as possible.

As the requirements of this Dept for Iron have not yet been completed  
you will secure also the services of not less than two persons, one, and  
one of an of proposed making of bar iron from pig metal -  
You will use the same communication with regard to the requirements.

directed with regard to boundaries.  
 If the Negro men are not competent to the construction of the boundary  
 surveying in and about Texas (other than the stream survey) you will have  
 the services of some one who is capable of putting a fence and of general  
 work would be preferable to one - or even three with no to do any.  
 The idea that you should fail to secure such capable help, as have  
 been described, in Alabama - or Georgia - you will compare with  
 Major H. Johns of the State & Mining Bureau in Richmond & perhaps  
 such men will be found of your return in Tennessee - if they are  
 not engaged in other than these services. They might be detailed

Honorable Mr. [illegible]  
[illegible]*

Confederate States of America  
The Department  
of the Army  
Richmond Va May 1864

Hon. S. B. Clinch  
Sir

Under the accompanying letter of appointment  
you are charged with the Iron Service of the  
Mississippi Department

It soon became apparent that before  
pleased you will proceed to Selma Ala - Communicate  
with Maj. H. A. Hunt, in Charge of the Iron Service  
etc. - and arrange a transfer of such business  
as he has made West of the Mississippi

After crossing the Mississippi you  
will communicate with the Chief of Ordnance at  
Shreveport, and upon an exchange of views you  
will determine whether the public interest will be  
served by a formal transfer of the Iron Service to that  
agent reporting to yourself, or to remain as at present.  
Unless some very decided advantage is to be gained it  
is here considered better not to multiply offices and  
responsibility already fixed. Your Service might  
better applied in inspection, advice, or general direction

Having made a brief examination of  
existing arrangements and the immediate status of  
supply, you will report to the General Commanding the  
Department or District. The object is to provide and  
arrange for future official communication, as suggested  
by the Military wants of the Department of Major Genl  
Hager should cross the river upon a proposed line  
of inspection not in concert with him

The collection of railroad iron  
and the Iron furnaces near Jefferson should require  
early attention. Railroad iron is to be purchased  
when practicable at rates to be decided by Committee

with Maj. Hunt and the officer already in charge of the  
Red River. It is as a last resort, imperative become  
imperative, advise with the Gov. Comm in Am. and  
with his approval, and under his order conduct the  
improvement through his District master. After again  
done for local defence we must arrange to send the  
vessel by first opportunity to Fort Chadron, or if that  
is not possible to Victorburg. In examining the furnace you  
will probably find one in good working order. Near  
Cypress Bayou, eighteen miles west of difference from  
and owned by, Arch. Perry & Co. The working capacity  
of this furnace has been reported at 5 tons per day.  
The iron is good gray pig suitable for strong and heavy  
Castings. It may be made to yield a good quality,  
and to this you should attend in due season. The  
information has been received of a large government  
engines at the furnace; you will probably find that  
a contract has been arranged by the government.  
The agent for the Naval Dept. who will be instructed  
to report to you.

A second furnace is miles from the above  
named, has been reported but with incomplete blast  
machinery. The proprietor, Dr. Hughes, offers a lease of  
the furnace and the use of the blast at \$1000 per  
annum. It will be very desirable to secure the long  
secure working of both furnaces by contract, and to secure  
the advance of government funds. But if advance is refused  
be made, security personal & real should be taken, and  
the services of competent Counsel secured in drawing up  
papers. If possible the C. S. District Atty.  
A copy of an approved form of Contract and  
bond is enclosed for your guidance, as far as circumstances permit.

After arranging the iron supply of the Indian  
Country, you will next proceed to Head Quarters of the

SECRET  
PARLIAMENT

Genl. Magruder, at a recent Council of War, your  
official services in aiding in the preparation of a general  
office ordnance officers for the Army, and the fact  
Commandment has been made, you will observe  
the reported one held in Anderson County, near the  
Smith River. If this communication should result favor-  
ably and the Genl. Commanding, should make a formal  
call upon you for the working of these lines, you are  
authorized to contract with private parties for the  
erection of a furnace and the delivery of iron for a  
period not exceeding 3 years and as much work as can be  
made - at prices approximating to the Government rates,  
and under the conditions of the instructions from the  
Genl. To responsible parties and upon payment  
Securely sent and forwarded in advance might be made,  
not exceeding one half the cost of the work. But if in  
your judgment a return of iron can be obtained  
within 8 months, you are empowered to secure the same  
as purchase, (conditioned upon payment of the same  
in a suitable kind of timber and material found  
to put up a furnace and have the iron worked on  
Government account.

A small furnace of an experimental char-  
acter is first recommended, and all contingencies of  
successful results must be completely set at rest before  
committing the Govt to large expenditure.

The questions of labor and transportation  
will very properly control your decision, with due regard  
given to existing military necessities. It would be desir-  
able to submit your report to the Secy of War before  
entering upon an extended Government contract.

But as time may be all important, you are  
empowered to act upon your judgment after consulta-  
tion with the Genl. Comdr and with Genl. Sanger if he  
is here, or with the Chief Ordnance of that Dept.

As soon as possible however, communicate the substance of  
of your action and proposed plan of action to be sub-  
mitted to the Secretary of War, and a meeting of the  
this office.

2. Plans of C. A. Lincoln will be detailed to various  
executive and disbursing officers. His accounts regularly  
settled will conform as far as practicable to the plan  
directed in the Ordnance regulations.

Where special Orders from the Director General  
Garrison will be allowed his actual traveling expenses in  
connection with his duties as a special agent, when traveling  
on duty under Order.

The aid also comprises to supplying the boats  
assistance for men, mechanics, laborers connected to the  
ation of your charge paying boat rates, and doing  
force as far as practicable from military men.

They are also authorized to purchase the necessary material & supplies and when transacted before the Commissary and Quarter master Supt. to be the cash first class.

With friends of doubt and anxiety in the  
letter you will be guided by the Army Regulations.

*Adm.*

Mr. John Elliott is herewith directed to report for order under his appointment with Provisional Engineers Corps.

Mr. Elliott is an expert in the inspection and has been personally engaged in the manufacture of iron. He has just returned from inspection duty thro' the Virginia Valley furnace and from special qualifications, it would be very desirable to continue his services.

Upon this ground, I respectfully ask  
his detail for Ordnance duty under the orders  
of this Bureau

Major

I am directed by Col. Boyce  
to request you to furnish a list of the various  
kinds of mechanics needed by the Government in  
its work shops in this place. An agent is about  
to start for England, who will select the most men  
and bring them over, to arrive here in the spring.

I will be obliged to you if you will let  
me have the list some time tomorrow, as the  
gentleman in question wishes to leave on  
Sunday -

Very respectfully

Thos. H.

THE ADJUTANT GENERAL'S OFFICE

WASHINGTON

April 12, 1883.

C.R.D.  
IN REPLY  
REFER TO

Respectfully returned to

The records show that one T. J. Finnie, not found as Thomas J. Finnie, was appointed 1st Lieutenant of Captain Robert Sterling's Company, Tennessee Heavy Artillery, Confederate States Army, October 14, 1861, and resigned October 30, 1861. This company served as Company "E", of Tennessee Heavy Artillery Corps. It appears to have been consolidated early in 1862, with other companies to form Captain Norman's (2nd) Company "C", 1 Regiment Tennessee Heavy Artillery.

He was appointed Captain, Nitro and Mining Corps, Confederate States Army, September 15, 1862, from the State of Tennessee. Promoted to Major, June 15, 1864.

He signed official papers dated October 25, 1864. Some of the official papers show his signature as Thomas James Finnie.

No later record of him has been found.

Upon receipt of this you will report  
to Lieut. J. B. Chumers at Atlanta Geo. and proceed with him to  
Shreveport La.

When you will proceed to San Antonio and report to Capt. A.  
H. Temple informing him that funds have been placed with Lieut. J. B.  
Chumers at Shreveport subject to his order; should any unforeseen  
accident occur, or as to prevent Lieut. Chumers from proceeding with  
the funds you will take charge of the same and report as before  
mentioned.

After remaining in Texas two weeks exclusive of time occupied  
travelling you will return to Richmond with reports from  
Capt. Temple's District. unless Capt. Temple considers it expedient  
for you to remain longer, in which case you will do so.

You will upon arrival at Shreveport communicate with  
Major Isaac Reed at Little Rock, arranging a meeting with him  
on your return from San Antonio, so that you may take charge  
of such papers as he may wish to forward to this office.

Sir,

10

Some time since I wrote to you for leave for Mr. Benjamin to reference to an appointment in the Engineer Corps but received no answer from him. Since that time, I have understood that there was a great demand at different times for Engineers in the Army of the Potomac and elsewhere, and now make the same application to you, in hopes of better success. As I stated to him, I can furnish the best of references as to ability, &c. and would present myself for examination if required, at Richmond, or any other point. I am confident that I could do much better service in that department than by throwing my individual arm into the ranks. I do not care for any thing higher than ~~the position of~~ promotion, if deserved. I enclose return postage. Awaiting an early answer,

I have the honor to be,

Hon. G. W. Randolph.

Apparatus for measuring the  
rate of evaporation of water from  
the surface of the sea. The  
apparatus consists of a large  
cylinder of glass, open at both  
ends, and filled with water.  
The cylinder is placed on a  
platform scale, and the weight  
of the water is measured at  
regular intervals.

The rate of evaporation  
is measured by the weight  
of the water lost.

Dear Sir

I wish to call your attention to a matter that for the good of the cause should be attended to & ask you if consistent with your views to submit the case to General Beauregard. I do not do it myself because the General is not acquainted with me, and might deem it an impudent intromedding with what does not concern me.

There are several political prisoners here, who are in a miserable state. and some of them I am assured by friends who are true Southern men, are innocent and have been arrested by Subordinate Officers - some from private malice. (Our glorious cause should not be stained with injustice when it is possible to prevent it). These men are imprisoned without the knowledge of the charges against them, and no means of refuting them. Would it not be well that the General order a Military

Sir

I have the honor of replying  
to Genl. Brannigan for an  
order to take possession of  
the gold belonging to the U. S. Bank  
with which to purchase in  
Cuba, nitric acid, steel and  
other materials with which  
to manufacture arms neces-  
sary for the army. To this I need  
not mention that my letter had  
been referred to Col. Gorgas, Chief  
of Ordnance with the approval  
of the Genl. I have since  
received the following dispatch  
from Col. Gorgas.

Send an agent for purchase  
as proposed to Genl. Brannigan  
When will you have the funds?

Signed. L. Gorgas

To which I replied "So soon as  
I could get an order from  
Genl B. I intended to take the  
gold". My agent is awaiting the  
Genl will give me an order to  
take the gold which is lying  
here doing me good to buy one.  
I will dispatch my agent at once  
& I am certain that I can bring  
in a large amt. I have been  
forced to suspend the manufac-  
ture of suits for want of cloth.

Have not more than need than  
will make 100,000 of caps.  
I await the decision of the Genl  
to whom the matter seems to be  
referred from the dispatch of Col  
Gorgas to govern my action in the  
matter. I enclose a copy of an  
order sent me from the Com-  
missary Department, which they  
require me to obtain before  
supplying the operations here  
with rations. Government has  
purchased up all the flour

And now can be had in the  
country I have got this or-  
der sent a provision to turn  
out ordnance stores rapidly  
if I am not started out will  
you get the order from the Genl

I am now collecting a number of the  
manufactures of domestic mills. Some having the purpose  
purpose. There are two in existence in the town but only one  
a number of them are made with the which are made in a place  
with other things. But there is no one here who is willing to sell,  
and in the process of collecting you are doing with the same. If  
I obtain the two mills I shall have to be in possession of them  
of the citizens desire the intention of which they stand on their  
roofs, shooting down the poor man who attempts to take it.  
I divided my fingers in the first place to take the tin which covered  
the Chapel walls in the next place the covering of the Out Buildings,  
Halls, the covering of the houses. I have suspended operation  
until I can have a definite order from you, whether I shall  
proceed to complete & erect for the purpose or whether I shall abandon  
the establishment of a Manufactory entirely.

There is only one Church in town covered with tin, & that is now  
in use for a Laboratory. It will in a day or two, be turned over to  
the Medical Department for a Hospital.

Waiting your orders - I have the honor to be

Dear Sir, I have the honor to acknowledge the receipt of your letter of the 13th inst. in relation to the destination of the 1st Army in northern Ind. I will not be able to supply any more than on your recommendation about of a month. Great quantities have been made on file. I have very little on file. As applied, the immediate demands of the Johnsons Army are now pressing the matter to their utmost capacity - when this pressure is over, you shall have the balance due you as soon as it is possible to roll it. We wish the whole done which I have no means of finishing.

Your letter, of 11th & 12th inst.  
 reached here during my absence. My resignation  
 has been accepted, & Capt. J. J. Sargent is now  
 in command of the Arsenal. It is due to my-  
 self that I shall not pass, unexpressed, the expressions  
 of dissatisfaction on the part of Genl. Briggs, with  
 reference to the conduct of Genl. Brown. I  
 have protested & do now protest (unofficially) against  
 the assumption of the Genl. that he has the direc-  
 tion of this Arsenal. He should know that "Arsenals,  
 being under the control of the Ordnance Bureau,  
 will not be interfered with by any other branch  
 of the service." (See Ordnance Regulations, Article  
 2. Sect. 1.) The Genl. directs that all the opera-  
 tions, now done in the laboratory, must be put to  
 stopping guns. This cannot be done. Gun  
 smiths, hammer smiths, blacksmiths, wheelwrights,  
 carpenters, & even molding shovellers, & might pos-  
 sibly spoil much valuable material. As it is, all  
 the men are at work at their particular branches

and the number of men in your charge of arms.  
I am confident that the amount is turning  
out as much as any other in the com-  
pany in proportion to the number of hands.  
The great difficulty has been to get your clothing  
as soon as I get a good number of uniforms,  
some are in the army store, it is your chance  
to get some as recruits, & begin to threaten to  
place them under the conscript act. The result  
is a stampede, knowing of my best men go off.  
Within the past two weeks, 40 hands have left me  
for this cause alone. About 90 given Smith, turn  
out about 100 guns per day, in good order. If any  
can do better, let it be tried. I have the pleasant  
satisfaction to know that all the commanding Genls.  
except Genl. Bragg, have appreciated the constant  
efforts I have been making since April 1861, to arm  
the soldiers in this great valley. I submit this  
enclosure, as I have done before, know & that he has  
a peculiar way of his own, in doing things just  
as Genl. Bragg may think best, and very often,  
without authority & without law.

Respectfully  
Wm. Richardson, Hunt

Capt H. O. O'Leary

Chief of Ord. W. Division

Corinth

Sir, I beg to acknowledge the receipt of your letter of the 20th Inst in which you request me to forward you prepared Ammunition for the Battery your name. I regret that it is out of my power to do so, as I have no powder here to prepare & furnish you with the fixed cartridges you require. I received 10,000 lbs of Powder from Mobile which was distributed as follows by General Beauregard: 6,000 lbs to Corinth & 4,000 lbs to Fort Pillow. In addition to the above I have received here 10,000 lbs, out of which 8,298 Rounds of Ammunition have been prepared & sent to Corinth. I have now on hand only 1,700 Rounds ready for use, as soon as Transportation can be obtained. I will make Requisition for Carriages & fit up the Guns as fast as possible, but having turned over all the Carriages Carriages and Equipments to Major Chamberlain I shall have to make Requisition on him to fit them up.

Your letter is addressed to me as Commanding the Ordnance Depot here in this you misapprehend my position, as the order was to establish a Depot at Vicksburg and an Arsenal here. Having accordingly to that had given up to Major Chamberlain, as Commander of the Depot at Vicksburg, all my Stores, I have on hand only the Gun Material, out of which to fabricate Ordnance and Ordnance Tools, & which are to be issued on the properly authenticated Requisitions of myself as

Chief

Chief Ordnance officer of the Army, or to Major  
Chambliss Commanding the Depot in a position  
there can now be no doubt, as it has been sufficiently &  
clearly defined in the case of Major Stockton. General  
Van Dorn's Chief of Ordnance & Col. Faulkner who  
commanded the Arsenal at Little Rock. Major  
Stockton as Chief of Ordnance on Genl. Van Dorn's  
Staff claimed the right of Commanding the Arsenal.  
The case was referred to the War Department, where it  
was decided that the Chief of Ordnance of the Army in  
the Field had nothing further to do with the Arsenal  
than to make Requisitions.

I have no doubt, that while laboring under this  
misapprehension, you sent me that Telegram to  
Memphis & which I then received, ordering me to this  
place & threatening to send another officer to manage  
an Arsenal established by the Confederate States.

I beg to this from my captious desire to stand upon  
my rights in my official intercourse with you.  
I know that both of us have only the good of the  
Country at heart, and shall at all times unite with  
you in promoting the common weal with all the  
energy I possess. Your experience has been as much  
greater than mine, that I shall gratefully acknowledge  
any suggestions you may deem it necessary to make  
& I hope you will do me the pleasure of visiting me  
as often as you can that I may profit by your  
suggestions.

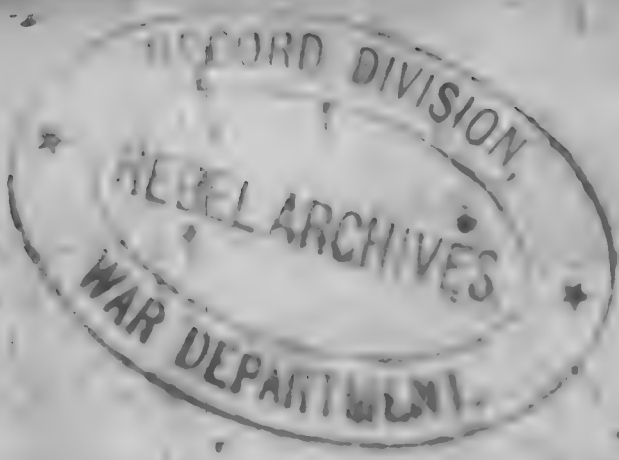

I have the honor to be

Sir

Yours very respectfully

Miss.

Sir;

Your requisition for cartridge bags, I received to day and forward you all I have on hand. The bags for 3<sup>rd</sup> Dr. rifle guns I will have made as soon as possible, they are an odd size and will have to be manufactured.

I beg leave to call your attention to the arrangement of the transportation on the railroad; it is of the very worst kind. I have had 400 lbs rifle powder and 50,000 pounds of lead at Meridian for a week. Engines, my messengers are coming up and others there but still it is not brought to this place, where I am prepared to turn out 50,000 rounds of ammunition for snare arms, per day to 15,000 or 20,000 rounds of ammunition for field guns, per month. I have no cannon powder to fix the ammunition.

Will you send me down the 6000 pounds sent by me to Corinth. I can better fix it here than you can at Corinth.

I beg leave to call your attention to the fact that Captain Chambray & Talson

one making requisitions on me, here with  
out a previous submittal of them for  
your approval. Will you send me  
an order of the General in Command  
on this matter, directing me to turn  
over no stones to any ordnance officer  
except it have your approval as Chief  
of Ordnance for the western department.  
I have turned over every thing in the  
shape of ordnance and ordnance stores  
to Major Chambliss, Depot Ordnance  
officer at Grenada. Would it not  
be as well to include him in the order  
so that as fast as I manufacture stores  
I can turn them over to him without  
a formal requisition. We had a con-  
versation about this matter, but I have  
never received an order from the  
General about it. Will you oblige  
me by tracing an engine and the  
necessary platform cars detailed to  
finish the telegraph to this point, if this  
is not done I think it will be next  
fall before it is through. I want cannon  
powder & if you will order me from  
5000 to 100.00 pounds I can furnish you  
with all the fixed ammunition you require.  
Fort Pillow is abandoned. Please order the  
powder here & I can get along. The Old  
Cotton Range & Memphis gone you will have to  
rely upon this point & Mount Vernon Arsenal  
for a large quantity of your stores.

If you can I hope you will facilitate  
my operations.

Very Respectfully

Wm. Richardson Hunt

Major Commanding Fairfield's Arsenal

P.S. Will you have an engine and the  
necessary cars placed at my disposal  
to collect up my ordnance stores  
that are scattered on the road  
& to bring forward the trains that  
are thrown on the different  
sidings of the Mobile & Ohio R.R.  
also to transport the lumber  
necessary to complete my works  
here

Dear friend, Baltimore, Decr  
25<sup>th</sup> 1850

Wm. L. Gage  
Albany

I am sensible that I may seem  
disposed to annoy you in relation to the matter of  
my resignation, but I must again trade it some  
time ago. I forwarded it to you, but you so gently insisted  
as upon my remaining a while longer, that I reluctantly  
consented to do so, under the hope & belief that when I should  
again urge it, you would consent to my retiring.  
About six weeks since, I sent my resignation to Genl.  
Bragg, requesting him to approve & forward it to the  
Secy. of war. It was while he was preparing to  
leave Dupelo for Chattanooga, and it was perhaps  
overlooked in the hurry of departure.

Having already made a most willing sacrifice of  
time, labor & money to aid in the establishment  
of our independence, I need not say that no or-  
dinary cause impels me to this course.  
As guardian & speculator of deceased friend's, I  
had in my possession & control, previous to the  
war, property belonging to widows & orphans, valued  
at upwards of a million of dollars, consisting  
of land, negroes & personal securities. For months

I have feared that the enemy would get control of  
the edifice, and that was the great danger for which  
my struggle before. I felt it would require all  
my time to protect rights & interests so sacred  
as those committed to my charge, and I was con-  
fident that if the enemy did get possession of  
the House, destruction would be all their work  
in a day. The facts are before me. The enemy are  
there, and the friends of the Union, with few that  
would I can present it, absolute want is before  
them, as all they have will soon be destroyed.  
My own interests are nothing in the matter, but  
I am sure that I have no right to have a drop  
ear to them whom I am so sacredly bound to  
protect. I must rescue them, & what they have  
left, from the utter ruin awaiting them; and I  
trust you will not hesitate, under such cir-  
cumstances, to accept my resignation.  
So long as, I could think my services might  
promote our means of defense, I did all I  
could to carry out your views; & I look back,  
with some degree of pride, upon what I have done  
towards arming our troops in this portion of the  
valley. Nor have I scarcely left pride when I look  
forward to what may yet be done through the work  
which I have built here under your direction.

But my resignation is no longer necessary for  
the benefit of the country, & the best of business  
standing there is left when compared with the dif-  
ficulties attending their union & growth, there must  
be a change.

Permit me, Sir, to thank you for the kind in-  
sistence you have uniformly shown for my ma-  
jority. In business as I live, in all  
other matters, you have done all in your power  
to aid & assist me, in money and advice, and  
I can testify to the untiring energy you have  
shown in endeavoring to develop the varied  
resources of the Confederacy in every possible way.  
When our independence is achieved, few men  
can look back, with more just pride, upon the  
part they have played in our grand drama, than  
yourself.

Please to relieve me from duty as soon as pos-  
sible, & you will confer a most signal obli-  
gation on

Yours most respectfully  
Wm. Richardson Hunt

Memphis 4th Dec 50

To the Hon Secretary of War

One of the most important considerations with us in the Mississippi Valley is to obtain arms for our troops. There are many thousands in Camps in this State and elsewhere ready to serve the country but have no arms. It would be difficult if not impossible to obtain new guns for all of these applying. A remedy for this I have been suggested that there are many thousands of old and double barreled shot guns in the hands of citizens in the Southern States which might be obtained for the use of the country when guns of repaired brought to a uniform size rebarbed and refitted with a barrel attached might be found a very useful if not the best gun which could be placed in the hands of our soldiers. To supply these guns an Ordnance Office was established here by the State of Mississippi. Mr. Hunt was placed in charge of the same. He has been working efficiently and in every way labors in the department and has rendered great service to the country. He is now making the request of Genl. McCall. Mr. Hunt has been constantly both here and at New Orleans for guns, <sup>bayonets</sup> cassettes, cartridges and harness also agents in the country procuring small arms which are brought here, repaired and refitted for the use of the country. It would take at least \$100,000 to pay for the arms now in the

thus have ordered, and which will be done in  
a few weeks. The banks to act in these  
matters have advanced considerable sums  
of money - it may be doubted whether they will  
continue to advance to the extent necessary.  
The radical defect to all this arrangement  
is this - we have no permanent office or agent  
must properly be charged by the government  
States. The business of blaming government  
reparations there is not carried on with the  
efficiency and energy that should be exerted  
for the want of an independent department  
and the means to carry it on. It is  
in hazard nothing in saying that there is  
no place in this valley for the Company  
States, where such an organization could be  
better managed or be of more use  
than at Memphis.

We would then to urge the Department that  
they will, without delay create an Ordnance  
office here, with complete means to purchase  
and repair arms much more efficiently  
than at now done. We try to suggest to  
the House would make a very suitable  
office. In relation to the House we have to  
say, that he does not want the Department  
- he is a man of large powers. He has  
prompted to do what he has done alone.  
from Chicago to promote the public welfare,  
and is perfectly willing, instead of doing,  
you should appoint some one else if you  
can find a man better qualified.  
The whole question is not still in the air.  
Federal States are dependent on arms. There

are scattered about in the hands of the citizens  
of the several States, and would be obtained  
if money were furnished to purchase them.

There could be repaired for the use of the  
Army five fold, if the money were furnished  
to enlarge the repair shops, and employ men  
there. If we mean to defend the country  
we cannot do so without arms. If then we  
get the arms at a future day, it will  
cost money to purchase and repair  
them. As we now have arms and are  
chose and repair them without delay, that  
they may be placed in the hands of those  
who are ready and willing to use them.

We earnestly entreat that you will not  
suffer the expediency of your engagement  
to crowd this matter out of consideration,  
but hope you will give it constant attention.

Respectfully  
Yours

My Dear Sir

For

Mr. James & Samuel

the bearers of this exhibited to me a  
model of a Submarine battery the sketch  
of which they will show you

The model was 28 inches long by 8 inches  
in diameter and seemed to me to be so  
good that I took the responsibility  
of furnishing them with 20 lbs of  
Powder and directed an experiment  
to be made. The machine was  
anchored by my direction in eight  
water and was placed 18 inches  
beneath the surface at 12 O'clock  
M. it remained so immersed until  
5 O'clock P.M. The boat selected for the  
experiment was a covered scow  
12 x 18 feet anchored above the  
battery and was allowed to drift  
down upon the machine. The moment  
the current bore the boat down upon  
the lever an explosion took place  
hurting fragments of the wreck -

the men and girls put in to the  
river and reducing the boat to a heap  
of ruins. The success was so gratifying  
that I have no hesitation in recommending  
that a number of these machines be  
built. They can be anchored in pairs  
25 feet apart across the river and  
the levers connected by wire so that  
it would be impossible for a boat  
to descend without coming in contact  
with them. The cost I think would  
not exceed \$100,000 each and they  
certainly will effect the object  
and deter the enemy from coming  
down in their gun boats.

I have no authority to make these  
machines unless you will give it  
to me - I will go ahead on them  
should you authorize me to do it.  
I have ready for trial six more  
rifled Parrot guns should you need  
them. I have ready also 500 Balls for  
these guns ready to send for ward,  
but have not done so because of your  
order not to send any more.  
I am having cast shells for the rifle  
32 pounders. The great difficulty in  
furnishing balls and shells for them is  
from the fact that all the shells sent

from Richmond are for the loaded guns  
ours are without bands. I think I will  
be able to ship you a lot of the shells  
this week weighing but even shells  
which weight will not be too great  
for our guns without bands.

I received the check for \$100,000 sent by  
you to me but could not negotiate it  
in our banks. I have had to send it  
to Richmond. Could not the department  
send checks for \$20,000 cash as  
easily as for \$100,000 I could  
negotiate them but no bank is willing  
to take as much as one hundred  
thousand dollars.

One of the 12 lb guns cast  
for you is now ready. Another will be ready  
by the last of this month and they can be finished  
at the rate of one per week. The carriages have  
all been finished, but Genl. Johnson ordered the  
four carriages for the 24 pounders to be finished  
first. They have now the carriages for  
the four 12 pounders. If you wish these  
altered, and the 24 lb guns now have mounted  
on them, it will leave me one 12 lb  
gun carriage; and I shall have 10 built the  
carriages for the whole battery except one  
carriage, and it will take a month to  
have them made. The 24 pound guns  
will be ready in a week. The scarcity  
of iron causes the delay.

Major Genl. C. B. Caldwell,  
Columbus,  
Ga.

In accordance with instructions from you, I proceeded to St. Louis, on the 7th Inst. to negotiate for the funds, requisite to carry out your views. A favorable exchange could not be procured at less than 22 p. cent, and therefore did not deem it judicious to purchase without further instructions from you. I accordingly telegraphed you, and waited some days for an answer, but none came. Learning of the unfortunate accident that had befallen you, and fearing it might be so serious, as to prevent your attention being brought to an early day, I returned to this point & communicated with you. The arrangement between Messrs. Richardson, Powell & myself was that they should telegraph to your Richmond where funds would be procured, provided I succeeded in the negotiation. That

I was at school. I have nothing new  
to say though. I telegraphed home at the time.  
There was another cause why I delayed in  
leaving. Mr. A. returned with Mr. Brown  
of La., he informed me that he had in Wash-  
ington one hundred and fifty thousand dollars  
sent by him in request to purchase arms,  
but that his agent there had not been able to  
do so; that the representatives of the Union were,  
that there were a good many old Span-  
ish flint-lock muskets, but no modern  
arms there. This agent he had ordered to be  
sent, to purchase to furnish arms there, and  
then to the other to this country.

These considerations induced me to suspend  
action till I could hear from you, and I  
trust my course will meet with your  
approval.

I have commenced moving my railroad  
store to Concord when made the necessary  
arrangements when my things protected  
there. I think it would be probably con-  
sistent to remove our machine shop or an  
any there. The cost of building machine  
tooling shops, & the various machinery  
connected therewith, would amount to, say,  
fifty thousand dollars, which is a con-

sidewalks run to frame an building, at this  
time of our need, but it is to be continued.  
As of the many things are missing,  
it will be almost impossible to replace it.  
I submit this to your better judgment, and  
strongly urging that the Director be made  
to and having the extraordinary battery made  
a copy of a possible, and will have some  
copy for shipment in a few days.

I ~~had~~ have insulated wire except to make  
a circuit of a dozen batteries which I  
propose to arrange so they can all be fired  
at once, by electricity. That I regard as the  
apparently most practical plan. The elec-  
tric battery in the bottom of the river.

us materially. I wrote Col. Logan about

GEN. POLK'S PAPERS.

~~What about...~~

W. H. Hunt

the main difficulty of getting the gun ready,  
still wish, besides the bother of getting your  
muzzle capulant to fit them up, upon a mottle  
look.

These combined obstacles have caused me to  
reflect a good deal upon our military con-  
dition; and I see but one way promptly to re-  
live ourselves. If you will allow me, I will  
submit my plan to your better judgment.

We have now in the field, say three hundred  
regiments, armed with the musket or other  
weapon, with bayonet, which makes them most  
efficient troops.

Many regiments are armed  
with the rifle & shot gun; and several, in this  
division, are without arms, awaiting the slow  
process of collecting them.

I believe mili-  
tary men agree as to the necessity of having  
the flank companies of every regiment armed as  
skirmishers.

In the early regiments, sent into  
the field, we had no rifles, as we had not time  
to arm them. They were all armed with the  
bayonet gun.

Now, we have, in every late re-  
giment, some companies armed only with  
the shot gun & rifle, because they cannot get  
the musket.

Would it not be best to arm  
the flank companies of all our regiments with  
what shot guns & rifles we have, and let them  
act as skirmishers? By this plan, you get  
down every four regiments, enough muskets  
to form a new regiment of eight companies,  
whose flankers can be armed with as skirmishers.

2  
Then, without impairing the efficiency of the  
army, you distribute the common rifle & shot  
gun through it, at the points where they  
will be most efficient; and also give Sturges  
to regiment men only armed with the shot  
gun & rifle. You would thus be able to add  
seventy gun thousand more men to the three  
hundred thousand men in the field; and that  
additional force would be with principal ef-  
fect in the contest now going on.

Another suggestion if you please. We shall  
find it very difficult to arm our Cavalry con-  
sidering with ~~the~~ pistol records, with having  
Indians and Shylahs now owning pistols and  
so much for arms that it might be possible  
to buy the purchase of arms without (properly)  
and use the money for buying such arms,  
a far more efficient arm for Cavalry. Now  
would not the lance be an excellent arm  
in such an emergency? I find it an im-  
portant part of the organization of European  
Cavalry, and we know that around our Western  
Indian tribes, it is a most formidable weapon.  
In Mexico, the Cavalry is armed ab-  
solutely with the lance, except.  
There is this subject say that the lance  
is more formidable than the sword, in the  
first shock of battle, but that the latter is  
most efficient in the mêlée. My sug-

question is to arm a portion of your Cavalry  
by with the lance, the double barreled  
gun & the heavy Roman sword, as they  
would thus be prepared for the first shock  
of the charge, as well as for the subsequent  
miles; the Roman sword being a most  
formidable weapon. To facilitate this  
suggestion about arming our flanking  
companies with the common sporting arms  
of the country, I want first the authority  
the authorities have a machine for  
molding the Minnie ball of any size,  
thus obviating the difficulty of having  
guns of different bore in the same regi-  
ment or company.

I trust, General, you will pardon the length  
of this letter and attribute my suggestions  
to an earnest wish to see all I can in  
removing obstacles from our path and not  
to any desire to interfere with the or-  
ganization of the army.

Very respectfully,
